

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

67. Withdrawn

68. (Currently amended) ~~The A semiconductor device according to claim 67, further comprising another internal terminal that is connected directly to the first internal power source line not via the first switching portion.~~ having a semiconductor integrated circuit, the semiconductor device comprising:

_____ a plurality of leads for supplying the semiconductor device with a first power source from an outside;

_____ a first internal power source line for supplying an internal circuit of the semiconductor integrated circuit with the first power source; and

_____ a first plurality of internal terminals for supplying the first internal power source line with the first power source from the plurality of leads;

_____ wherein one of the first plurality of internal terminals is connected directly to the first internal power source line, and others thereof are connected to the first internal power source line via a first switching portion.

69. Withdrawn

70. (Currently amended) The semiconductor device according to claim ~~69~~ 68, further comprising ~~another internal terminal that is connected directly to the second internal power source line not via a switching portion.~~ :

a second plurality of leads for supplying the semiconductor device with a second power source from an outside;

a second internal power source line for supplying the internal circuit of the semiconductor integrated circuit with the second power source; and

a second plurality of internal terminals for supplying the second internal power source line with the second power source from the second plurality of leads;

wherein one of the second plurality of internal terminals is connected directly to the second internal power source line, and others thereof are connected to the second internal power source line via a second switching portion.

71. Withdrawn

72. Withdrawn

73. (Currently amended) The semiconductor device according to claim ~~67~~ 68, wherein the internal circuit is a group of digital circuits.

74. (Currently amended) The semiconductor device according to claim ~~67~~ 68, wherein the first switching portion comprises a plurality of switching elements, and each of the first plurality of internal terminals is connected to the first internal power source line via a different switching element of the plurality of switching elements.
